Top-class, mobile surgical suction device ATMOS Record 55 DDS

ATMOS Record 55 DDS with autoclavable container system

ATMOS Record 55 DDS – the powerful allrounder!

The ATMOS Record 55 DDS is most suitable for the versatile use in OT due to the high suction performance and the high vacuum.

The ATMOS Record 55 DDS is the first choice when a noiseless and powerful suction system is required. Approved technology make it a reliable system for many surgical applications:

Visceral surgery

- Orthopaedic surgery
- Thorax surgery
- Vascular surgery, etc.

Particularly with regard to aesthetic-plastic surgery - especially the liposcution - the ATMOS Record 55 DDS is most suitable. The ATMOS Record 55 DDS is now available in 2 Direct Docking versions:

- 1. ATMOS Record 55 DDS with the reliable reusable ATMOS container system
- 2. ATMOS Record 55 3DS the new disposable ATMOS container system, hygienic and easy to handle. (in preparation)

The advantages of the ATMOS Record 55 DDS at a glance:

- Powerful: The airflow rate of 55 litres per minute always provides a free vision in the operating field.
- Almost noiseless: Low operation noise for concentrated work in the OT.
- Easy handling
- Hygienic: Modern container systems and filters protect staff and patients.
- Reliable: Approved technology guarantees trouble-free operation.
- No breakdown caused by blocked bacterial filter
- Quick and safe reprocessing of the suction unit due to quick and easy to clean surfaces and very few corners and edges.

Details ATMOS Record 55 DDS

2

1 Hose connection

with twisted inlet, reduces foam formation and thereforee, longer filter duration.

Quick exchange of 3 bacterial filter

wihich has an extended filter surface.

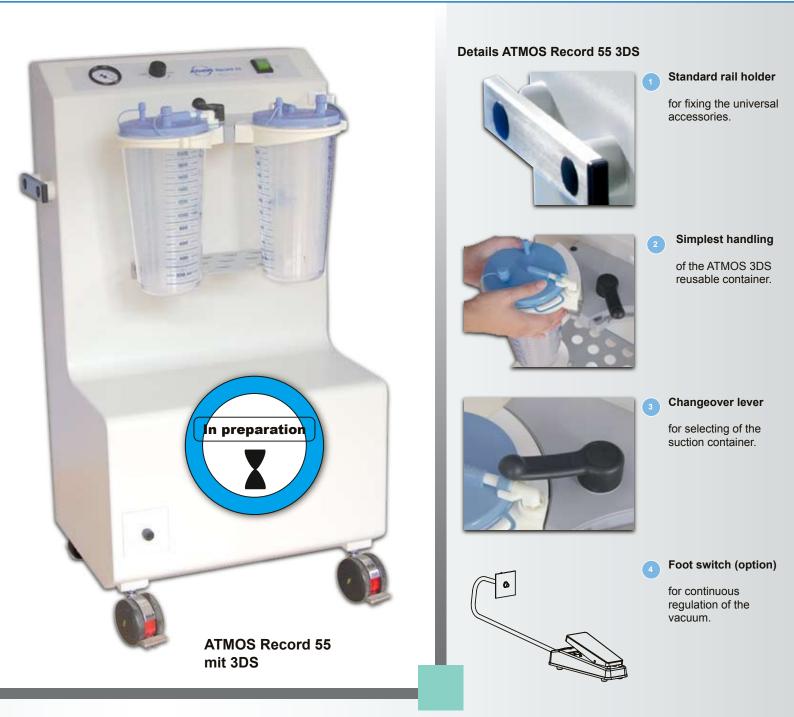

anaesthesiaproof.

for comfortable selection of the collection jar during trolley operation.

ATMOS Record 55 3DS¹⁾ disposable container system

1)

Different to usual disposable container systems the ATMOS 3DS container system is not connected to the aggregate by means of a hose but with the approved Direct Docking technology. Here the adapter ring is fixed to the docking station of the ATMOS suction system - that's all! A fast exchange of containers and the mix up of connections or hoses is ruled out - this is ATMOS 3DS!

ATMOS Record 55 DDS ATMOS Record 55 3DS User packages

ATMOS Record 55 / DDS / 3DS

- User packages
- General accessories

- Top suction performance
- Almost noiseless
- Easy handling
- Short start-up time

These images also contain optional functions.

ATMOS Record 55 DDS with 2 x 3 I container

ATMOS Record 55 3DS with 2 x 3 I container

ATMOS Record 55 with standard rail

Silent, powerful and user-friendly The surgical suction device with maximum performance!

Accessories for ATMOS Record 55 standard rail		
① Secretion jar lid incl. standard rail holder	444.0650.0	
② Socket nipple set comprising double socket nipple,hose reducer and mechanical overflow safety	444.0640.0	
grad. secretion jar 1.5 l, glass, height 192 mm, Ø 115 mm	444.0032.0	
Container jar 1.5 l, plastic, sterilisable up to 136°C	444.0036.0	
③ grad. secretion jar 3 l, glass, height 247 mm, Ø 145 mm	444.0033.0	
Container jar 3 I, plastic, sterilisable up to 136°C	444.0037.0	
grad. secretion jar 5 l, glass, height 302 mm, Ø 169 mm	444.0034.0	
Container jar 5 I, plastic, sterilisable up to 136°C	444.0038.0	-
DDS Safety jar 250 ml with integrated DDS-bacterial filter oversuction stop, incl. adapter (for arthroscopy, oral, and maxillofacial surgery, liposuction etc.)	444.0646.1	
Consumables for ATMOS Record 55 standard rail		
Suction hose, silicone, Ø 10 mm, L = 2 m, (136 °C) Change: after 20 x autoclaving	000.0243.0	
Suction hose, silicone, Ø 6 mm, L = 2 m, (136 °C) Change: after 20 x autoclaving	000.0361.0	
Suction hose, disposable, Ø 6 mm, L = 2.10 m, not autoclavable, 50 pcs. Change: 1 x per patient	006.0059.0	
Receptal [®] 1.5 I, suction bags, w. integr. overflow valve filter, not autoclavable, 50 pcs. Change: 1 x per patient	310.0222.2	
Receptal [®] 2 I, suction bags, w/o. integr. overflow valve filter, not autoclavable, 50 pcs., Change: 1 x per patient	443.0257.0	
Receptal [®] 2 I, suction bags, w. integr. overflow valve filter, not autoclavable 50 pcs., Change: 1 x per patient	443.0257.2	
Receptal [®] 3 I, suction bags, w/o. integr. overflow valve filter, not autoclavable, 50 pcs. for tandem hose connection Change: 1 x per patient	444.0153.0	
Receptal [®] 3 I, suction bags, w. integr. overflow valve filter, not autoclavable 50 pcs., Change: 1 x per patient	444.0154.0	
④ Medi-Vac [®] internal container 1 I, 50 pcs., Change: 1 x per patient	312.0474.0	

Technische Daten	ATMOS Basard 55 DDS
Technische Daten	ATMOS Record 55 DDS
Air flow rate of pump:	55 l/min (± 3 l/min)
Max. vacuum at sea level:	-98 kPa (-980 mbar / -735 mmHg)
Power consumption:	approx. 100 W
Voltage:	230 V~ 50-60 Hz; Special voltage: 100 - 127 V~ 50-60 Hz;
Noise level:	46 dB (A) @ 1 m (acc. to ISO 7779)
Operating time:	continuous operation
Ambient conditions:	10+32 °C; 2080 % air humidity without condensation;
during operation	air pressure 7001060 hPa
Dimensions (H x W x D):	940 x 500 x 390 mm, without collection jar
Weight:	36 kg, without collection jar
Classification:	degree of protection:type BF; protection category: IPX1;
	protection class: I;
	class IIa (acc. to appendix IX, directive 93/42/EEC)
